PROPERTIES

Already used in toys, children articles, food contact material and medical devices, this new NON-PHTHALATE plasticizer will guarantee to the end-users the safest soft vinyl strips and sheets. Our label "NON-PHTHALATE" will give you the assurance that our soft vinyl is no longer using phthalates and will offer you the best choice for human health and environment protection.

Risk assessment conclusions published in the Official Journals of the European Union 2006/C 90/04.

RISK ASSESSMENT Conclusion of the assessment on the risks to		PHTHALATE		NON PHTHALATE

✓ SAFE X RISK FOR HUMAN HEALTH OR ENVIRONMENT

* migration of the plasticizer shall not exceed the maximum level authorized by regulation DINP cannot be used in toys and childcare articles which can be placed in mouth. Use of DEHP is unauthorized in all toys and childcare articles.

- Product Raw Material**
- Pure new pvc particles
 - Not recycled material
 - No paraffin wax
 - Environmental

- Plasticizer**
- DOTP (non-phthalates)**
- Environmental
 - Heat-resistant/ Cold-resistant
 - Good Softening Property
 - High Electrical Resistivity
 - Low Volatility
 - Inhibit Oil Exudation

Compare with DOP plasticizer

DOTP: Environmental	DOP: Not environmental
DOTP: non-phthalates	DOP: phthalates
DOTP pass the ROHS /Reach	DOP: fail the ROHS/Reach
Heat-resistant	DOTP-DOP
Cold-resistant	DOTP-DOP
Electrical Resistivity	DOTP is 20times of DOP
Volatility	DOTP-DOP
Human Toxicity	DOTP-DOP

ACCESSORIES

ABOUT US

Zampoukas company belongs to SME – small and medium-sized enterprises and has its headquarters in Thessaloniki, Greece.

Since 1994 we have been specializing in importing/ producing and processing industrial equipment and machinery parts. 30% of our goods are imported from the most reliable European suppliers while most of them are produced in our company's workshop with a view to selling them not only inland but to Balkan markets as well.

CURTAIN STRIP PVC / PROPERTIES

Non-Phthalate PVC Strip Curtains for industries This makes it safer for the consumers, employees, workers as well as the environment. Usage of Non-Phthalate plasticizers results in strip curtains with tremendous benefits.

1. Flexible and Transparent: The Non-Phthalate PVC strip curtains are clear and transparent, allowing the inflow and outflow of pedestrians and packages they want to transfer. These strip curtains that are Phthalate free are more flexible when compared to the ones consisting of Phthalates.

2. Side effects free: Employees working in industries move in and out of these strip curtains daily. Considering their health, the absence of Phthalates in PVC strip curtains is important. It makes it harmless or side effect free when we humans are exposed to it, while the ones with Phthalates cause cancer.

3. Economical Pricing: The PVC strip curtains are a low-cost shield for various industries serving the purpose of preventing contamination and temperature control.

4. Noise Reduction: Some heavy-duty industries tend to have noise involving work stations. Strip curtains isolate the noise from a place prone to high decibels by absorbing it. This helps the employees on the other side of the curtain to concentrate on their work.

5. Restricts movement of Pollutants: There are several forms of pollutants in the air, some are even invisible to our eyes. In industries where the health and safety code is a priority there the dust, smoke and fumes are to be restricted.

6. Energy Conservation: PVC strip curtains are well known as temperature controllers. They prevent the energy from escaping out, be it the heat energy or the cold air. This is the kind of barrier industries are looking for when it comes to maintaining a temperature-controlled environment.

7. Providing Pest control: These strip curtains serve as a great pest control when it comes to food industries. These pests like birds and insects fly around looking for food and try to encroach such places. The strip curtains prevent them from entering and contaminating the food.

8. Standard Quality: These PVC strips are non-toxic due to the absence of Phthalates so it can be touched without being harmed later. These strips are going to be hanging from the ceiling throughout the years being pushed in and out all day, they are so strong and durable they do not crack. On exposure to harsh conditions, the strips do not form bubbles within the strips adhering to the quality.

9. Strength and Durability: Non-Phthalate PVC strips have better physical properties keeping them strong and durable for 3+ years when used outdoors and for a much longer time when used indoors.

10. Cleaning and Maintenance: The cleaning procedure involved in the PVC strip curtains are quite simple. Soak a sponge in warm water and run it through the strips to clear off any dust or dirt. Doing this regularly would be an ideal way of maintenance.
